

Automated Real Estate Solutions Seminar

An IREM and RealComm Seminar Surviving the Economic Slowdown: Analyze, Automate, Streamline

In today's turbulent economy, real-time access to accurate data is no longer a luxury – it's a necessity. Real estate investors and asset managers must be able to accurately assess trends, analyze their portfolios, and evaluate their options in order to make effective decisions. Learn about the technologies and tools that are available to support investment management, accounting, property management, and operations. You'll hear about the latest web-based solutions for budgeting and forecasting, financial management, accounts receivable and payable, automated leasing, project management, automated work orders, and more – plus view case studies of real estate owners who have realized significant savings by automating and streamlining their internal business processes. Information is a competitive advantage that can mean the difference between survival or failure. This seminar will demonstrate how visibility into financial and operational data will allow you to make effective decisions and maximize your investment returns.
